

11-81-2503 Pocket Nurse® NG & Tracheostomy Teaching Torso

A three-dimensional, two-sided hand-painted molded torso. One side is a transparent view of the sagittal plane including the nose, mouth, pharynx, trachea, esophagus, lungs and stomach. The other side depicts the anatomically correct view of a torso for teaching the correct method of measuring the NG tube. Torso also features a tracheostomy to demonstrate a variety of care techniques.

- NG tube insertion, irrigation, monitoring and removal
- Gastric lavage and gavage
- Tracheostomy care and suctioning
- Student skills checklist
- Weight: 8 lbs.
